

BBQ PERMIT INSTRUCTIONS

1. Portable barbecues can only use charcoal briquettes, natural gas, or electricity as the fuel.
2. The location of the barbecue device should be in a non-enclosed area, located at least five (5) feet from any combustible material, and shall have at least five (5) feet of clear working space completely around the device.
3. The barbecue device must be so isolated that persons other than the operators may not approach nearer than five (5) feet of the device.
4. Only adults shall be responsible for all cooking activities.
5. A fire extinguisher with a minimum of 20BC classification to be provided.
6. No cooking under canopies or in unapproved indoor structures.
7. All cooking devices shall be secure, stable, and level.
8. No smoking within 25 feet of propane cylinder and no smoking inside tent or canopy.
9. All propane connections shall be tested for leakage by performing the manufacturers recommended testing procedures. No refueling on site and storage limited to supply on site.
10. Waste coals shall be fully extinguished and cold and then placed into a clean noncombustible container for disposal. Embers and ashes shall be thoroughly soaked with water.
11. The use of tabletop portable propane/butane cooking devices is prohibited.
12. Cooking devices using propane must have the propane bottle outside the booth and properly secured in an upright position. Use of propane indoors is PROHIBITED.
13. All electrical wiring, connections, and lighting devices shall be "U.L." approved.
